

1. Walking in the lights

Cheryl Pope, *Up Against*, 2010/2013

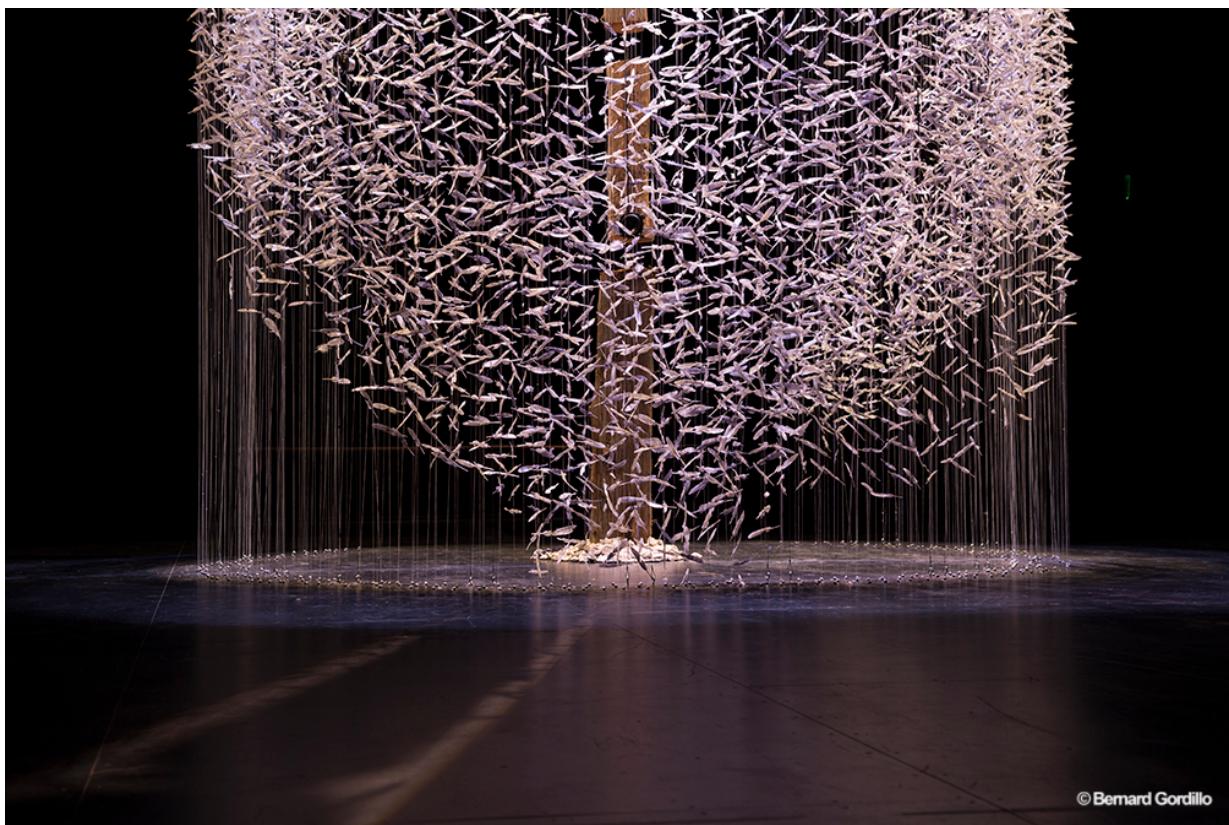

walking in the light clouds, leave a dark trace

2. Swarm theory + point cloud — Kinect sensor

-anonymous agent behavior flow, following,flocking behavior

3. Visual theory in an empty house—have to think about possible outcome besides visuals?

Continent-Cloud, from Brazilian artist Rivane Neuenschwander

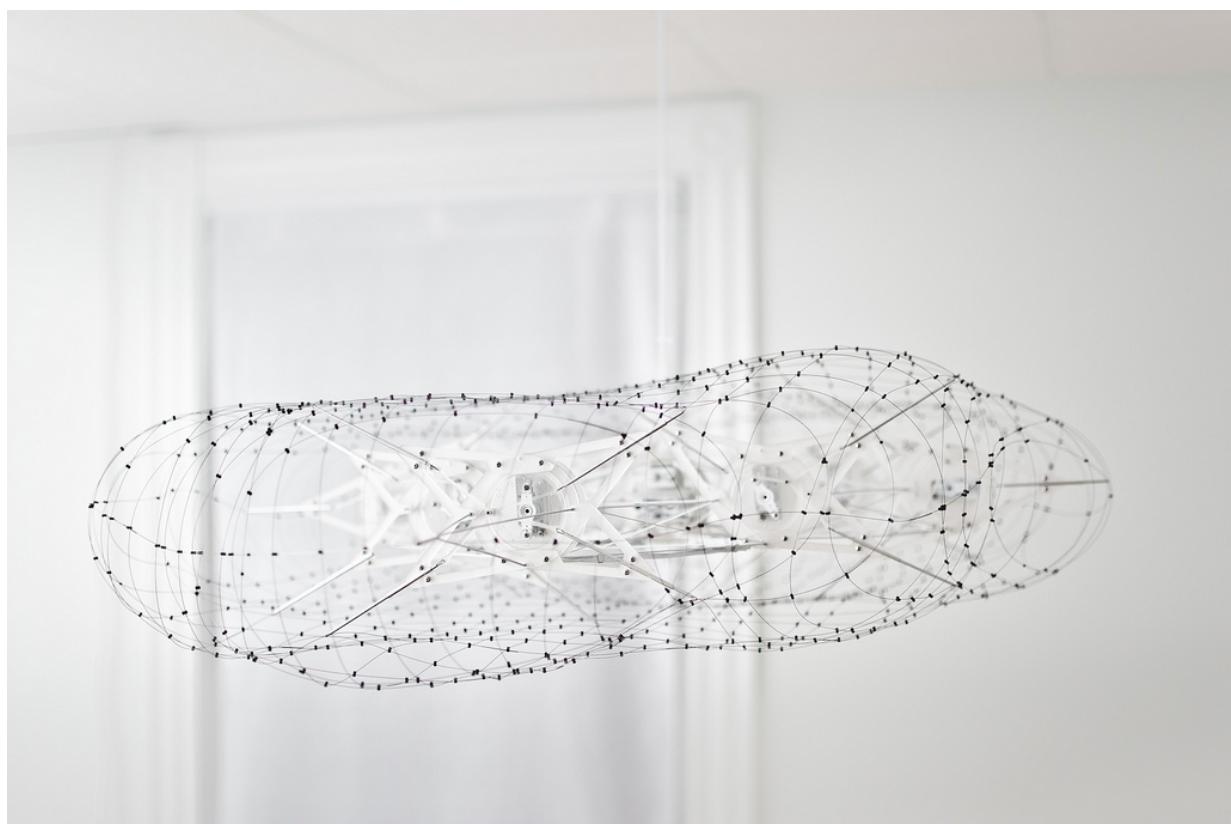

4.Clouds metal blooming

Zirkumflex presents 'BotoxCloud', an interactive Installation by SAQ

instead of responding to people's movement, what it does is to predict what users' next step is gonna be, invite people to walk through computer generated path —>create experience for users instead of active interaction.

5.Clouds projects from the past

6.Sea level - tide and wave simulation

<http://bora.co/kinetic-cloud-a-bora-studio-installation/>

how to make them connected to signal that comes from live streaming throughout max real-time communication —
to control the light clouds

Technology + skill:

max - real-time communication that controls the lights dimming
fabrication

project management
concept development
